MidAtlantic Farm Credit, ACA

Report on Internal Control Over Financial Reporting

The Association's principal executives and principal financial officers, or persons performing similar functions, are responsible for establishing and maintaining adequate internal control over financial reporting for the Association's Consolidated Financial Statements. For purposes of this report, "internal control over financial reporting" is defined as a process designed by, or under the supervision of the Association's principal executives and principal financial officers, or persons performing similar functions, and effected by its Board of Directors, management and other personnel. This process provides reasonable assurance regarding the reliability of financial reporting information and the preparation of the Consolidated Financial Statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Association, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial information in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the Association, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Association's assets that could have a material effect on its Consolidated Financial Statements.

The Association's management has completed an assessment of the effectiveness of internal control over financial reporting as of June 30, 2009. In making the assessment, management used the framework in *Internal Control — Integrated Framework*, promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as the "COSO" criteria.

Based on the assessment performed, the Association concluded that as of June 30, 2009, the internal control over financial reporting was effective based upon the COSO criteria. Additionally, based on this assessment, the Association determined that there were no material weaknesses in the internal control over financial reporting as of June 30, 2009

Management's Discussion and Analysis of Financial Condition and Results of Operations

(dollars in thousands)

The following commentary reviews the financial condition and results of operations of MidAtlantic Farm Credit, ACA (Association) for the period ended June 30, 2009. On November 25, 2008, the stockholders of Valley Farm Credit, ACA and MidAtlantic Farm Credit, ACA approved a merger (Merger) to merge Valley into MidAtlantic; the FCA granted its final approval of the Merger on December 31, 2008 and the Merger was effective on December 31, 2008. The information contained herein reflects the merged entity for periods prior to December 31, 2008. The comments contained in this report should be read in conjunction with the accompanying consolidated financial statements, notes to the consolidated financial statements and the 2008 Annual Report of the Association. The accompanying consolidated financial statements were prepared under the oversight of the Audit Committee of the Board of Directors.

LOAN PORTFOLIO

The Association provides funds to farmers, rural homeowners and farm-related businesses for the financing of short- and intermediate-term loans and long-term real estate mortgage loans. The Association's loan portfolio encompasses a well diversified range of agricultural commodities, with cash grains, poultry and dairy representing the largest segments. In addition, the Association provides a significant amount of loans to lessors of agricultural real estate. Farm size varies and many of the borrowers in the region have diversified farming operations. This factor, along with the opportunities for non-farm income, impacts the level of dependency on any particular commodity.

Gross loans at June 30, 2009 totaled \$2,256,313 compared to \$2,190,189 at December 31, 2008, increasing \$66,124 (3.02 percent) during the first six months. The Association's allowance for loan losses of \$15,652 decreased \$1,331 (7.84 percent) during the first six months of 2009 resulting in net loans (gross loans less allowance for loan losses) of \$2,240,661 and \$2,173,206 at June 30, 2009 and December 31, 2008, respectively. Nonaccrual loans decreased \$2,580 (5.71 percent) from \$45,158 at December 31, 2008 to \$42,578 at June 30, 2009 resulting in a decrease in the ratio of Nonaccrual loans to total loans from 2.06 percent to 1.89 percent.

There is an inherent risk in the extension of any type of credit and, accordingly, the Association maintains an allowance for loan losses consistent with the risk measured in the portfolio.

Credit administration remains satisfactory and the overall credit quality of the Association's loan portfolio has remained acceptable. A provision for loan losses of \$2,000 and \$2,500 was recorded in the first and second quarters of 2009, respectively, that after giving effect to the net impact of charge-offs in excess of recoveries, decreased the Association's allowance \$1,331 as of June 30, 2009. The allowance for loan losses represented 0.69 percent and 0.77 percent of total loans at June 30, 2009 and December 31, 2008, respectively. See also Note 2 of "Notes to the Consolidated Financial Statements".

RESULTS OF OPERATIONS

For the three months ended June 30, 2009

Net income for the three months ended June 30, 2009 totaled \$7,581, a decrease of \$2,273 (23.07 percent) compared to the three months ended June 30, 2008. Major changes in the components of net income are identified as follows:

- Net interest income increased \$291 (2.12 percent) for the quarter ended June 30, 2009 compared to the same period in 2008. The increase in net interest income is primarily attributable to incremental earnings on an increasing loan portfolio as loan volume increased \$130 million (6.14 percent) from June 30, 2008 and net of a slightly increased portfolio margin attributable to the decrease in interest rates which occurred over the past year. This was partially offset by a \$799 decrease in the Association's earnings credit in its equity due to the sharp decrease in interest rates during the past twelve months.
- The risks identified in the Association's loan portfolio required a provision for loan losses of \$2,500 to be recorded in the second quarter of 2009 whereas a provision of \$838 was recorded in the second quarter of 2008. The Association's delinquent loans increased from .79 percent at December 31, 2008 to 1.05 percent of the portfolio at June 30, 2009. See also Note 2 of "Notes to the Consolidated Financial Statements".
- At June 30, 2009 and 2008, the Association accrued an estimated patronage receipt (reported as "Equity in earnings of other Farm Credit institutions" on the Consolidated Statements of Income) of \$3,863 and \$3,550, respectively, which is based on second

quarter operations only; management anticipates additional income for each successive quarter in 2009. Since this income from AgFirst Farm Credit Bank (the Bank) is reasonably estimable and because there is a history of these earnings, management is of the opinion that including this income in quarterly operations provides shareholders with a more accurate forecast of annualized net income.

- Noninterest income in the second quarter of 2009 included a net increase in fee related income of \$432, increases on net home loan sales of \$19 and an increase in other noninterest income of \$39.
- Noninterest expense for the second quarter of 2009 was \$9,177 as compared to \$7,437 for the second quarter of 2008 or an increase of \$1,740 (23.40 percent). The increase of \$1,761 for Salaries and employee benefits includes a \$1,340 employee benefits variance primarily attributable to an increase in pension related expenses due to the adverse impact of the economic downturn on the District's pension investment portfolio. The magnitude of this difference as compared to 2008 is expected to continue throughout 2009. The remaining Salaries and employee benefits variance of \$421 includes \$362 of severance related expenses attributable to the Merger.

Insurance fund premium expense increased \$181 (23.78 percent) resulting from the increased loan portfolio and an increase in the insurance premium for loans as determined by the Farm Credit System Insurance Corporation (FCSIC) for 2009.

Occupancy and equipment and Other operating expenses decreased \$202 from \$2,258 to \$2,056 illustrating the Association's cost management, particularly in a challenging economic environment, and realization of some operating efficiencies attributable to the Merger.

For the six months ended June 30, 2009

Net income for the six months ended June 30, 2009 totaled \$14,234 or \$6,100 (30.00 percent) less than the six months ended June 30, 2008. Year-to-date operations for the Association simulated second quarter operations. Major changes in the components of net income are identified as follows:

- The decrease in net interest income of \$103 (0.38 percent) is primarily attributable to a \$1.9 million favorable increase in volume and a \$.5 million favorable increase in net margin, which was offset by a \$1.9 million decrease in earnings credit on the Association's equity due to lower interest rates and

a \$.6 million unfavorable impact attributable to the increase in nonaccrual loan volume.

- Charge-offs and risks identified in the Association's loan portfolio required a provision for loan losses of \$4,500 to be recorded in the first six months of 2009 as compared to a \$1,200 million provision in the first half of 2008.
- At the period ended June 30, 2009, the Association accrued an estimated patronage receipt of \$7,559 as compared to \$6,970 at June 30, 2008. This accrual is based on first half operations only; management anticipates additional income for each successive quarter in 2009. Since this income from the Bank is reasonably estimable and because there is a history of these earnings, management is of the opinion that including this income in quarterly operations provides shareholders with a more accurate forecast of annualized net income.
- Noninterest income included an increase in fee income of \$565. As fees are common practice in a marketplace, the Association utilizes this vehicle to help achieve an acceptable return on its capital. The Association also received additional income from its crop insurance program based on claims experience.
- Noninterest expense increased \$3,519 (24.28 percent) for the first six months of 2009 as compared to 2008. The year-to-date increase for Salaries and employee benefits of \$3,285 (37.62 percent) includes a \$2,572 employee benefits variance primarily attributable to an increase in pension related expenses due to the adverse impact of the economic downturn on the District's pension investment portfolio. The magnitude of this difference as compared to 2008 is expected to continue throughout 2009. The remaining Salaries and employee benefits variance of \$713 includes \$412 of severance related expenses attributable to the Merger.

Insurance fund premium expense increased \$347 (23.24 percent) resulting from the increased loan portfolio and an increase in the insurance premium for loans as determined by FCSIC for 2009.

Occupancy and equipment and Other operating expenses decreased \$113 from \$4,267 to \$4,154 illustrating the Association's cost management, particularly in a challenging economic environment, and the favorable impact of travel related expenses attributable to the decrease in fuel costs.

- The Provision for income taxes in 2009 includes the impact of a deferred tax asset valuation allowance.

FUNDING SOURCES

The principal source of funds for the Association is the borrowing relationship established with the Bank through a General Financing Agreement. The General Financing Agreement utilizes the Association's credit and fiscal performance as criteria for establishing a line of credit on which the Association may draw funds. The Bank advances the funds to the Association in the form of notes payable. The notes payable are segmented into variable rate and fixed rate sectors. The Association utilizes the variable rate note to fund variable rate loan advances and operating funds requirements. The fixed rate note is used specifically to fund fixed rate loan advances made by the Association. The total Notes payable to the Bank at June 30, 2009 was \$1,928,772 compared to \$1,852,726 at December 31, 2008. This increase during the period of \$76,046 (4.10 percent) corresponds to the augmentation in the Association's loan volume, receipt of prior year Bank patronage, offset by current year net cash generated from operating activities and patronage payments to stockholders.

CAPITAL RESOURCES

Members' equity at June 30, 2009 totaled \$363,318 an increase of \$9,758 (2.76 percent) compared to total members' equity of \$353,560 at December 31, 2008. Net income of \$14,234 for the six months ended June 30, 2009 and net member capital stock/participation certificates retired of \$428, an estimated cash patronage distribution accrual for the first six months of 2009 totaling \$4,066, and patronage distribution adjustment of \$1 account for the change.

FCA regulations require that all Farm Credit institutions maintain a minimum permanent capital ratio of 7.0 percent and total surplus and core surplus ratios equal to 3.5 percent. These ratios are calculated by dividing the Association's permanent capital, total surplus and core surplus as defined in FCA regulations, by a risk-adjusted asset base. At June 30, 2009, the Association's permanent capital, total surplus and core surplus ratios equaled 14.01 percent, 13.55 percent and 11.31 percent, respectively.

NOTE: Shareholder investment in the Association could be affected by the financial condition and results of operations of AgFirst Farm Credit Bank. Copies of AgFirst's annual and quarterly reports are available upon request free of charge by calling 1-800-845-1745, ext. 378, or writing Stephen Gilbert, AgFirst Farm Credit Bank, P.O. Box 1499, Columbia, SC 29202. Information concerning AgFirst Farm Credit Bank can also be obtained at their website, www.agfirst.com. Copies of the Association's annual and quarterly reports are also available upon request free of charge by calling 1-800-333-7950, or writing John E. Wheeler, Jr., Chief Financial Officer, MidAtlantic Farm Credit, ACA, P.O. Box 770, Westminster, MD 21158-0770, or accessing the website, www.maafc.com. The Association prepares a quarterly report within 40 days after the end of each fiscal quarter, except that no report need be prepared for the fiscal quarter that coincides with the end of the fiscal year of the institution.

Notes to the Consolidated Financial Statements

(dollars in thousands, except as noted)
(unaudited)

NOTE 1 – ORGANIZATION, SIGNIFICANT ACCOUNTING POLICIES, AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

The accompanying financial statements include the accounts of MidAtlantic Farm Credit, ACA (the Association). A description of the organization and operations of the Association, the significant accounting policies followed, and the financial condition and results of operations as of and for the year ended December 31, 2008, are contained in the 2008 Annual Report to Shareholders. These unaudited second quarter 2009 consolidated financial statements should be read in conjunction with the 2008 Annual Report to Shareholders.

The accompanying consolidated financial statements contain all adjustments necessary for a fair presentation of the interim financial condition and results of operations and conform with accounting principles generally accepted in the United States (GAAP) and prevailing practices within the banking industry. The results for the six months ended June 30, 2009, are not necessarily indicative of the results to be expected for the year ending December 31, 2009.

Certain amounts in the prior period's consolidated financial statements may have been reclassified to conform to the current period's consolidated financial statement presentation. Such reclassifications had no effect on the prior period net income or total capital as previously reported.

The Association maintains an allowance for loan losses in accordance with GAAP. The loan portfolio is reviewed quarterly to determine the adequacy of the allowance for losses. As of June 30, 2009, the allowance for losses is adequate in management's opinion to provide for possible losses on existing loans.

In addition to the recently issued accounting pronouncements discussed in the 2008 Annual Report to Shareholders, effective January 1, 2009, the Association adopted Financial Accounting Standards Board (FASB) Statement of Position (FSP) No. 157-2, "Effective Date of FASB Statement No. 157." This FSP delayed the effective date of Statement No. 157 for nonfinancial assets and nonfinancial liabilities until fiscal years beginning after November 15, 2008. The impact of adoption requires additional fair value disclosures (see Note 5), primarily regarding other property owned, but does not have an impact on the Association's financial condition or results of operations.

In April 2009, the FASB issued FSP No. 107-1 and Accounting Principles Board (APB) No. 28-1, "Interim Disclosures about Fair Value of Financial Instruments." This FSP requires disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. The FSP is effective for interim periods ending after June 15, 2009 (see Note 6).

In May 2009, the FASB issued SFAS No. 165, "Subsequent Events," which sets forth general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Recognized subsequent events should be recognized in the financial statements since the conditions existed at the date of the balance sheet. Nonrecognized subsequent events are not recognized in the financial statements since the conditions arose after the balance sheet date but before the financial statements are issued or are available to be issued. This Standard, which includes a required disclosure of the date through which an entity has evaluated subsequent events, is effective for interim or annual periods ending after June 15, 2009 (see Note 7).

NOTE 2 – ALLOWANCE FOR LOAN LOSSES AND IMPAIRED LOANS

An analysis of the allowance for loan losses follows:

	For the six months ended June 30,	
	2009	2008
Balance at beginning of period	\$ 16,983	\$ 11,556
Provision for (reversal of) loan losses	4,500	1,337
Charge-offs	(5,867)	-
Recoveries	36	51
Balance at end of period	\$ 15,652	\$ 12,944

The following table presents information concerning impaired loans as of June 30,

	2009	2008
Impaired loans with related allowance	\$ 18,260	\$ 5,225
Impaired loans with no related allowance	25,837	11,757
Total impaired loans	\$ 44,097	\$ 16,982
Allowance on impaired loans	\$ 4,283	\$ 2,951

The following table summarizes impaired loan information for the six months ended June 30,

	<u>2009</u>	<u>2008</u>
Average impaired loans	\$ 49,252	\$ 18,350
Interest income recognized on impaired loans	213	173

NOTE 3 – EMPLOYEE BENEFIT PLANS

The following is a table of retirement and other postretirement benefit expenses for the Association:

	<u>For the six months ended June 30,</u>	
	<u>2009</u>	<u>2008</u>
Pension	\$ 3,040	\$ 551
401(k)	232	251
Other postretirement benefits	402	344
Total	<u>\$ 3,674</u>	<u>\$ 925</u>

The following is a table of retirement and other postretirement benefit contributions for the Association:

	<u>Actual YTD Through 6/30/09</u>	<u>Projected Contributions For Remainder of 2009</u>	<u>Projected Total Contributions 2009</u>
Pension	\$ 6	\$ 6	\$ 12
Other postretirement benefits	195	245	440
Total	<u>\$ 201</u>	<u>\$ 251</u>	<u>\$ 452</u>

Actuarial calculations as of the last plan measurement date (December 31, 2008) projected contributions of \$12 to the pension plan for 2009. However, market conditions could impact discount rates and return on plan assets which could make additional contributions necessary before the next plan measurement date of December 31, 2009.

Further details regarding employee benefit plans are contained in the 2008 Annual Report to Shareholders.

NOTE 4 – MERGER OF MIDATLANTIC FARM CREDIT, ACA AND VALLEY FARM CREDIT, ACA

Effective December 31, 2008, Valley Farm Credit, ACA (Valley) merged into MidAtlantic Farm Credit, ACA (MidAtlantic). The Merger was accounted for at historical cost in a manner similar to a pooling of interests and, accordingly, the Association's financial statements have been restated to include the accounts and operations of both associations for all periods prior to the Merger. The merged Association succeeded to all rights and obligations of the two former associations pursuant to the Merger. The accounting practices used by the former associations were consistent in

all material respects. Certain reclassifications were made to conform financial statement presentation. Inter-company transactions between the former associations were immaterial.

NOTE 5 – FAIR VALUE MEASUREMENT

Effective January 1, 2008, the Association adopted Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" (SFAS No. 157). This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements for certain assets and liabilities measured at fair value on a recurring and non-recurring basis. These assets and liabilities primarily consist of assets held in trust funds, standby letters of credit, impaired loans, and other property owned.

SFAS No. 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability. SFAS No. 157 establishes a fair value hierarchy for disclosure of fair value measurements to maximize the use of observable inputs, that is, inputs that reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of the reporting entity. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The three levels of inputs and the classification of the Association's financial instruments within the fair value hierarchy are as follows:

Level 1

Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets. The Association's Level 1 assets at June 30, 2009 consist of assets held in trust funds related to deferred compensation and supplemental retirement plans. The trust funds include investments in securities that are actively traded and have quoted net asset value prices that are directly observable in the marketplace.

Level 2

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability. The Association has no Level 2 assets or liabilities measured at fair value on a recurring basis at June 30, 2009.

Level 3

Level 3 inputs to the valuation methodology are unobservable and supported by little or no market activity. Valuation is determined using pricing models, discounted cash flow methodologies, or similar techniques, and could include significant management judgment or estimation. Level 3 assets and liabilities also could include instruments whose price has been adjusted based on dealer quoted pricing that is different than the third-party valuation or internal model pricing.

Level 3 assets at June 30, 2009 include impaired loans which represent the fair value of certain loans that were evaluated for impairment under SFAS No. 114. The fair value was based upon the underlying collateral since these were collateral-dependent loans. The fair value measurement process uses independent appraisals and other market-based information, but in many cases it also requires significant input based on management's knowledge of and judgment about current market conditions, specific issues relating to the collateral and other matters. As a result, these fair value measurements fall within Level 3 of the hierarchy. When the value of the collateral, less estimated costs to sell, is less than the principle balance of the loan, a specific reserve is established. Other property owned is classified as a Level 3 asset at June 30, 2009. The fair value for other property owned is based upon the collateral less estimated costs to sell. Level 3 liabilities at June 30, 2009 include standby letters of credit whose market value is internally calculated based on information that is not observable either directly or indirectly in the marketplace.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following table presents the assets and liabilities that are measured at fair value on a recurring basis at June 30, 2009 for each of the fair value hierarchy levels:

	June 30, 2009			
	Level 1	Level 2	Level 3	Total Fair Value
Assets:				
Assets held in trust funds	\$ 283	\$ -	\$ -	\$ 283
Total Assets	\$ 283	\$ -	\$ -	\$ 283
Liabilities:				
Standby letters of credit	\$ -	\$ -	\$ 462	\$ 462
Total Liabilities	\$ -	\$ -	\$ 462	\$ 462

The following table presents the changes in Level 3 assets and liabilities measured at fair value on a recurring basis:

	Standby Letters Of Credit
Balance at January 1, 2009	\$ 298
Total gains or (losses) realized/unrealized:	
Included in earnings	-
Included in other comprehensive loss	-
Purchases, sales, issuances and settlements, net	164
Transfers in and/or out of level 3	-
Balance at June 30, 2009	\$ 462

Assets and Liabilities Measured at Fair Value on a Non-recurring Basis

Assets and liabilities measured at fair value on a non-recurring basis at June 30, 2009 for each of the fair value hierarchy values are summarized below:

	June 30, 2009				YTD Total Gains (Losses)
	Level 1	Level 2	Level 3	Total Fair Value	
Assets:					
Impaired loans	\$ -	\$ -	\$ 13,977	\$ 13,977	\$ (1,638)
Other property owned	\$ -	\$ -	\$ 58	\$ 58	\$ -

NOTE 6 — DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS

The following table presents the carrying amounts and fair values of the Association's financial instruments at June 30, 2009.

Quoted market prices are generally not available for certain System financial instruments, as described below. Accordingly fair values are based on judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

The estimated fair values of the Association's financial instruments are as follows:

	June 30, 2009	
	Carrying Amount	Estimated Fair Value
Financial assets:		
Cash	\$ 1,627	\$ 1,627
Loans, net of allowance	\$ 2,240,661	\$ 2,282,578
Assets held in trust funds	\$ 283	\$ 283
Financial liabilities:		
Notes payable to AgFirst Farm Credit Bank	\$ 1,928,772	\$ 1,957,439

A description of the methods and assumptions used to estimate the fair value of each class of the Association's financial instruments for which it is practicable to estimate that value follows:

- A. **Cash:** The carrying value is a reasonable estimate of fair value.
- B. **Loans:** Because no active market exists for the Association's loans, fair value is estimated by discounting the expected future cash flows using the Association's current interest rates at which similar loans would be made to borrowers with similar credit risk. As the discount rates are based on the Bank's loan rates, as well as management estimates, management has no basis to determine whether the fair values presented would be indicative of the value negotiated in an actual sale.

For purposes of determining fair value of accruing loans, the loan portfolio is segregated into pools of loans with homogeneous characteristics based upon repricing and credit risk. Expected future cash flows and interest rates reflecting appropriate credit risk are separately determined for each individual pool.

Fair value of loans in a nonaccrual status is estimated to be the carrying amount less specific reserves.

The carrying value of accrued interest approximates its fair value.

- C. **Investment in AgFirst Farm Credit Bank:** Estimating the fair value of the Association's investment in the Bank is not practicable because the stock is not traded. The net investment is a requirement of borrowing from the Bank and is carried at cost plus allocated equities in the accompanying Consolidated Balance Sheets. The Association owns 7.75 percent of the issued stock of the Bank as of June 30, 2009 net of any reciprocal investment. As of that date, the Bank's assets totaled \$30.0 billion and shareholders' equity totaled \$1.5 billion. The Bank's earnings were \$116 million during the first six months of 2009.
- D. **Notes Payable to AgFirst Farm Credit Bank:** The notes payable are segregated into pricing pools according to the types and terms of the loans (or other assets) which they fund. Fair value of the notes payable is estimated by discounting the anticipated cash flows of each pricing pool using the current rate that would be charged for additional borrowings. For purposes of this estimate it is assumed the cash flow on the notes is equal to the principal payments on the Association's loan receivables plus accrued interest on the notes payable. This assumption implies that earnings on the Association's interest margin are used to fund operating expenses and capital expenditures.

- E. **Commitments to Extend Credit:** The estimated market value of off-balance-sheet commitments is minimal since the committed rate approximates current rates offered for commitments with similar rate and maturity characteristics and since the related credit risk is not significant.

- F. **Assets Held in Trust Funds:** See Note 5 for discussion of estimation of fair value for this instrument.

NOTE 7 – SUBSEQUENT EVENTS

The Association has evaluated subsequent events through July 30, 2009, which is the date the financial statements were available to be issued.
